

Sheng Chen

Auckland, New Zealand · 0226 076 822 · chsh48@gmail.com · sheng.nz
AWS Certified Solutions Architect – Associate · Full-Stack Developer · Cloud Engineer

CERTIFICATIONS

AWS Certified Solutions Architect – Associate · Amazon Web Services · Achieved 24 March 2026

TECHNICAL SKILLS

Languages: Java, Python, C, C#, JavaScript, SQL

Web Development: React, Node.js, TypeScript, .NET, MongoDB, Vue, Svelte

Cloud & Infrastructure: AWS (Lambda, DynamoDB, API Gateway, Bedrock, S3, Amplify, Cognito), Azure

AI & Data: AWS Bedrock, Generative AI, GitHub Models, Machine learning

Tools & Practices: Git, RESTful API design, Serverless architecture, CI/CD, JWT

EDUCATION

Master of Information Technology – First Class Honours · University of Auckland · Feb 2024 – May 2026

Master of Public Administration · Zhejiang University · Sep 2018 – Jun 2023

Bachelor of Agronomy · Zhejiang University · Sep 2010 – Jun 2015

WORK EXPERIENCE

Human Resources Manager · Huzhou Agriculture and Rural Affairs Bureau · Zhejiang, China · Jun 2022 – Feb 2024

- Managed full employee lifecycle including hiring, onboarding, benefits administration, and retirement processes.
- Handled payroll calculations and cross-departmental coordination, developing practical knowledge in workforce and compensation systems.
- Coordinated compliance reporting and process improvement initiatives across departments.

Water Resources Manager · Yuyue Town Government · Zhejiang, China · Sep 2016 – Jun 2022

- Oversaw water quality monitoring and environmental protection for 11 villages, working extensively with large datasets and field reports.
- Generated regular technical reports and presented findings to non-technical stakeholders, bridging the gap between data and decision-making.
- Led coordination of river dredging, pollution control, and ecological restoration projects across the region.

SOFTWARE DEVELOPMENT PROJECTS

AI-Powered Equipment Maintenance Dashboard · [Frontend Lead & AWS Solutions Architect](#)

Stack: React, TypeScript, Tailwind CSS, AWS Lambda, Amplify, DynamoDB, Bedrock, Cognito

- Architected serverless predictive maintenance platform serving 700+ industrial engines.
- Integrated AI-powered recommendations via AWS Bedrock and Claude 3.5 Sonnet.
- Implemented role-based access control; optimised to achieve sub-2 second load times.

Mortgage Broker Website · [Sole Developer – Independent Project](#)

Stack: React, TypeScript, Tailwind CSS, Vite, Supabase, EmailJS, GA4, Vercel

- Designed and built a bilingual (Chinese/English) financial services website with fully responsive UX.
- Secure admin CMS with role-based access control, protected routes, and Supabase-backed dynamic content.
- Compliance-focused user flows with legal disclaimers, consent-gated forms, GA4/Vercel Analytics, and multilingual SEO.

Auckland Weekend Planner · [Personal Project](#) · weekend.sheng.nz

Stack: Next.js, TypeScript, Tailwind CSS, AWS Lambda, DynamoDB, API Gateway, Bedrock, S3, CloudFront

- Aggregates events from three Auckland sources with deduplication; Claude on Bedrock generates personalised itineraries by audience, budget, and sub-region.
- Dynamic timeline with per-event swap/delete; real-time weather integration and content safety filtering.

Auckland Running Route Planner · [Personal Project](#) · running.sheng.nz

Stack: React, TypeScript, Vite, Tailwind CSS, Mapbox GL JS, Recharts, Radix UI, AWS Lambda, API Gateway, OpenRouteService, Vitest

- Parameterised route generation (distance, terrain, difficulty) and free-draw mode with road/trail snapping.
- Interactive elevation profile with real-time map sync; GPX export compatible with Garmin Connect.

Havenly – Children’s Emotional Support App · [Sole Developer](#) – [Independent Project](#) · havenly.sheng.nz

Stack: React, TypeScript, Vite, CSS Modules, GitHub Models, Firebase

- Bilingual (Chinese/English) wellbeing app for children and teens across three age modes (toddler/kid/teen) covering mood tracking, AI chat, and insights.
- AI companion with crisis keyword detection, bilingual safety responses, and guardrails against medical diagnosis; garden reward system tied to daily check-in streaks.

Buy or Bye – Household Management Web App · [Full-Stack Developer](#)

Stack: React, Node.js, MongoDB, Python, AI/ML

- AI-powered household management system with OCR receipt processing and real-time expense analytics.
- Led authentication using JWT and bcrypt; delivered ML-based purchase recommendations via Python pipeline.

Personal Blogging System · [Full-Stack Developer & Git Manager](#)

Stack: Svelte, Node.js, SQLite, TinyMCE

- Full-featured blogging platform with user authentication, nested comments, and WYSIWYG editing.
- Designed database architecture, implemented RESTful APIs, and managed team Git workflow.

ABOUT

I graduated from the University of Auckland with a Master of Information Technology (First Class Honours) in 2026, and I'm excited to bring my full-stack and cloud skills into a team environment here in New Zealand. Before IT, I spent eight years in local government in China — managing water resources across 11 villages and later handling HR and payroll. That work involved a lot of data: generating reports, presenting technical findings to non-technical decision-makers, and figuring out how to make complex information actually useful. I think that background makes me a more grounded engineer.

I have volunteered with several community and environmental organisations in New Zealand, including:

- Conservation Volunteers New Zealand (CVNZ) — weed removal and tree planting activities
- Earth Action Trust — helping guide waste sorting and recycling activities
- Fair Food NZ — sorting and rescuing food to help reduce food waste

Outside of work I'm usually out running — I've completed full marathons and love Auckland's coastal trails.
